

Redback® 150W 100V/Stereo Class-D PA Amplifier With Dante®

This compact amplifier featuring Dante connectivity provides the latest technology for digital ready PA systems while offering the flexibility of 150W 100V line or 2x75W stereo operation (plus bridging mode if needed). This amplifier can be completely controlled over Dante using standard web based GUI, allowing it to be utilised across small or large scale PA installations where IP based devices are required. It also features a built in digital signal processor (DSP) and RS-232 interface.

Full DSP processing with Dante's easy to use web GUI controller

Features - Flexible 4-8 Ohm or 70V/100V line output - Dante® 2CH digital audio, balanced or unbalanced line level analog inputs - Dante® 2CH digital audio, balanced or unbalanced line level analog and amp outputs - Built-in audio DSP processor - Control via RS-232, LAN and Web GUI - Half rack design/one rack design

Redback® Compact Class-D 100V PA Amplifier With Bluetooth

Designed as an all-in-one compact amplifier for retail music systems and small scale PA systems requiring 100V line output, Bluetooth connectivity and telephone paging input. These desktop amplifiers offer Class-D performance in a compact package offering 3 pin XLR balanced input, two stereo RCA inputs (music & telephone paging), plus wireless audio streaming via Bluetooth. When connected Bluetooth has priority over music input. Mic & telephone paging inputs mute other inputs when active.

Available in 30W, 60W and 120W, it makes an ideal zone amplifier or 100V line PA solution for retail and hospitality requirements.

Features - 100V, 70V and 4Ω outputs - Stereo RCA music and telephone paging inputs - Bluetooth priority over music input - Mic & telephone paging priority over all inputs - 3 pin XLR balanced microphone input - Adjustable VOX muting - Adjustable paging level - Ground lift switch - Individual mic and music level adjustment - Bluetooth on/off switch - Bass and treble adjustments

2 Year Warranty

Redback® PA Amplifier Module With Dante®

This advanced PA amplifier with in-built Dante® integration offers PA installers the ability to connect and control loudspeakers over IP networks. The unit is designed to be small enough to fit within the ceiling space next to the connected speaker if required or fasten to the rear of the speaker backbox via the included mounting flanges. It provides class-D performance with superb efficiency and low heat generation for up to 2x35W RMS into 4/8 Ohms. It can be controlled using Dante's standard suite of software offering an array of DSP signal processing options, presets, equalisation and more. The A3169 offers Redback's most advanced feature set in an amplifier and is well suited to commercial and domestic systems, allowing any low impedance speaker to become Dante® equipped.

Features: - Advanced Class-D audio amplifier with Dante integration - Rated Power 2x 35W RMS @ 4/8 ohm - Peak Power 2x 100W@4/8 ohm - Dante 2x2 audio supported - 2-ch Amplifier Speaker out - Audio DSP processing includes Gain, ducking, 8-band PEQ, Limiter and delay control - Supports standby/sleep mode - Supports multiple protection mechanisms including over-voltage, over-current, and over-temperature safeguards - Control via TCP/IP /Web GUI and Dante controller - Power via PoE++

2 Year Warranty
